Ethernet Private Networking

Layer 2 Dedicated Ethernet Connectivity

For customers who are ready to take control of their network, ensure security, and get the most value for their money, Ethernet Private Networking from AireSpring is the answer. AireSpring provides a dedicated low-latency data link connection based on physical addressing, ensuring fundamental network security without compromising quality or speed, and allowing customers to implement settings over their own private networks with the ability to prioritize traffic and put it into customized queues. As a truly private network for enterprises needing to connect branch-to- branch while keeping their data safe, Ethernet Private Networking is configured on a case-by-case basis, providing personalized flexibility and scalability, all while maximizing bandwidth and savings.

FEATURES

Local Area Network to Wide Area Network Connectivity

Ethernet Private Networking smoothly integrates with existing LAN networks, allowing in-house IT staff to seamlessly link customer locations.

Customizable Setups

E-Line (Point-to-Point, or Point-to-Multipoint) and E-LAN (Multipoint) configurations enable customers to connect their locations over a secure extended LAN, or route virtual private lines from remote locations to a single hub.

Low Latency

High-capacity network ensures the real-time transmission of business-critical applications, backed by a comprehensive service level agreement.

Reliability and Continuity

Ethernet Private Networking supports a full range of business continuity and failover options, with the flexibility to protect your customers. Improve connectivity and take control of your network.

Versatile and Flexible

Ethernet Private Networking is ideally suited to carry Internet Protocol-based applications and supports hybrid networking, giving your customers easy access to AireSpring's award-winning MPLS network and cloud communications suite.

Managed Solutions. Personalized Service.

The AireSpring Advantage

AIreCONTROL

AIreCONTROL is our proprietary AI-powered, cloud-based IT Service Management (ITSM) platform that provides 360 degrees of complete visibility and control, consolidating every aspect of your network, and unifying every process, device, circuit, and data point onto a single cloud-based platform.

Tier 3 Engineer POD Support

We replace outdated legacy, reactive support models with Dedicated Tier 3 Engineering AIrePODs. Your Assigned Engineering POD stays with you from end to end and is available to assist within 10 minutes of opening a case.

Single-Source Global Provider

AireSpring partners with more than 265+ carriers and cable companies in over 190 countries to directly source connectivity and deliver a complete single-source managed solution.

Global Field Services

Our field services capabilities supplement your in-house IT team globally to fulfill on-site implementation requirements, including site surveys, structured cabling, extended wiring, equipment configuration and installation of IP phones, POTS replacement, Wi-Fi access points, switches, routers, and SD-WAN and firewall appliances.

One Company. Single Point of Contact.

We eliminate the drain on your resources and costly expense of vendor sprawl. All services are delivered by a single vendor on a fully managed service, which allows you to avoid the finger-pointing and vendor blame game that occurs when you have services delivered by a different vendor than your connectivity.

Award-Winning Customer Experience

AireSpring has won over 100 coveted industry awards, most notably the 2025 People's Choice Stevie Award for Favorite Customer Service, as well as multiple Stevie Awards for Favorite Customer Service Team.

Family Owned and Operated Since 2001

AireSpring is an established name in the industry that you can count on for your communications. We've been in business for over two decades and are profitable and debt-free.

Escalation List Up to Our CEO

We stand behind our service 100%! In fact, we're so committed to ensuring complete satisfaction that we provide all our customers with an escalation list giving you access to our executive management all the way up to our CEO.
